## Profile

---

Frontend Developer Intern at AXIA HUB, applying foundational knowledge of HTML, CSS and BOOTSTRAP to build web interfaces. I'm skilled in using Git and GitHub for version control and have experience with responsive design frameworks. I'm a quick learner and a dedicated team player, ready to contribute to challenging development projects.

## Professional Experience

---

### Frontend developer, AXIA HUB

07/2025

Jos, Plateau

- HTML & CSS: Built robust and semantic website structures for a car selling platform and a food recipe blog, ensuring cross-browser compatibility.
- Bootstrap: Implemented responsive design across both projects, creating mobile-first layouts that provide a seamless user experience on any device.
- Git & GitHub: Practiced effective version control by managing project repositories, committing changes, and working within a team environment.
- Project Development: Independently handled the full development of two distinct websites, showcasing my ability to translate ideas into functional web applications.

## Education

---

### B.S.Computer Science, Veritas University

10/2023 – Present

Jos, Plateau state

My journey to Veritas University began with a dedicated preparation for my WAEC and JAMB exams. I was proud to secure a JAMB score of 225, which, combined with my successful passes in all subjects in the WAEC, earned me a place at Veritas University. I'm excited to embark on this academic chapter and build on the strong foundation my exam results provided."

## Skills

---

### HTML

#### HTML

Proficient in writing clean, semantic, and well-structured HTML5 to build the foundation of web pages. Skilled at creating accessible and standards-compliant markup, ensuring a solid base for content presentation and search engine optimization.

### BOOTSTRAP

#### BOOTSTRAP

Skilled in using the Bootstrap framework to accelerate the development of responsive, web projects. Proficient in leveraging Bootstrap's pre-built components and grid system to ensure consistent design, cross-browser compatibility, and a polished user experience.

### CSS

#### CSS

Expertise in styling web pages using CSS3 to create visually appealing and responsive designs. Experienced in implementing layouts, typography, and color schemes, and adept at using techniques like Flexbox and Grid to achieve complex and modern UI designs.

### GIT & GITHUB

#### GIT & GITHUB

Experienced in using Git for version control to track and manage project code history. Proficient in essential Git commands, including committing, branching, and merging. Skilled in using GitHub for collaborative development, code management, and team-based workflows through pull requests and issue tracking.
